HODGSON'S

IN *and* OUTDOOR EQUIPMENT
for
YOUR SUBURBAN *or* COUNTRY HOME

THE greatest charm of the Suburban or Country Home is in its surroundings. Simple and attractive furnishings do more to make a home than the dwelling itself. In the country outdoor equipments are about as important as those used for the interior.

In this booklet we are showing practical and attractive equipment that we have selected after some thirty years' experience in this line and feel that they will add much to any suburban or country home.

The outdoor articles are well made of materials best suited for outside use and thoroughly painted and ready for immediate use.

These articles can be seen at our Boston and New York show rooms or at our outdoor exhibits.

Gable Roof Colonial Garden House 8 x 10 ft. Terminal Model

COLONIAL GARDEN HOUSES

ON this and the following page are shown our Colonial Garden Houses. One we call the Terminal model as it is generally placed at the end of the garden; the other the Vista model, it being placed in the centre of the garden and open on both sides. In the Terminal we furnish a 10 ft. bench and in the Vista two 8 ft. benches.

One house shows the gable style of roof; the other a hip roof. You may have your choice at the same price for either model.

The benches and columns are painted white, the lattice and roof colonial green.

It is constructed in sections which are quickly assembled by the owner.

Price \$150.00

HODGSON CAMP HOUSES

THESE camp houses have screened openings, the openings being protected by canvas covered frames that are adjustable from the inside, and held at any point from wide open to closed tight and fastened. The roofs and sides are of cedar, and the floors hard pine. Outside panel doors with mortised locks and brass hardware are used. The exterior is treated on the sides with Cabot's brown stain, and the roofs a moss green.

They are very durable and can be left standing throughout the year without the slightest danger from heavy snow storms.

These camps are made in 6 x 12 ft. units similar to our cottages. The partitions are canvas curtains to slide on wires. The curtains are all 6 x 7 ft., and as many as desired can be used. All curtains are the height of the side walls. Each house has a few lights of glass in addition to the canvas shutters giving plenty of light inside when the shutters are closed.

HODGSON BIRD HOUSES

OUR bird houses are attractive and practical. Being well made of red cedar, and well painted, they will last for years. They can be easily opened up for spring house cleaning, which should be done each season before nesting time. Many of the larger bird houses represent the several types of old New England homesteads so well known and appreciated, and add much to the attractiveness of any grounds. These are the first six houses shown and are for martins and birds of the swallow family.

ATTRACTING THE WILD BIRDS

Up to within recent times many who provided care, food and shelter to our wild birds did so from humanitarian motives and the pleasure to be had from having them in their grounds and around their homes. But

In winter we have only to offer food to the birds to attract them. Shelter and protection will keep them. In summer they must have protection and a home—nature will provide food in the summer, which consists mainly of insects, bugs and worms.

They must have a place to drink and bathe both in summer and winter. Birds long absent from a neighborhood will find their way back soon after provisions for their comfort are made. There is no bird that can be so readily increased in number, in many localities, by putting up nesting houses for them, as can the purple martin. But the list of birds that can usually be attracted to our homes in the northeastern and middle

today we are realizing more and more the great value of the wild birds in protecting our shrubs, trees, orchards, crops, etc., from the awful horde of insect pests which invade our gardens and cause losses of untold amounts each year; and so the wild birds are now most enthusiastically catered to and sought after creatures.

cleaned out each year before the birds are ready for nesting.

The birds can get along very comfortably in summer without seeking food from their human friends. but in winter, when the frozen insects, eggs, seeds of weeds, etc., on which they naturally feed, are covered by snow, it is essential that food be placed where they can find it else many of them will perish.

We are often asked what to feed the birds. Almost anything eatable will keep them from starving. They like cracked corn, cracked rice, grain, scratch feed, bread crumbs, chaff from the barn floor, hemp and sunflower seeds, mixed bird seeds, etc. Nut meats are eagerly taken; also suet and fats of all kinds.

Try coaxing some of the birds to feed from your window sills, using our window feed and suet shelters. It will surprise you to see how tame they will become, especially the chickadees and nuthatches.

JOHN MCENTEE BOWMAN
PRESIDENT
PRIVATE OFFICE

*E. F. Hodgson Co.,

Gentlemen—

I have often thought that the man who designed and developed the Hodgson House should be decorated as a special benefactor of mankind and had he lived in any other country but America, I believe he would have been.

I have been using the Hodgson Houses for years, both in Maine and in Westchester County and each Spring I marvel how they have withstood the blasting winters they have gone thru. Each one in particular seems to defy the elements and when you realize that both of these climates are very hard during the winter months and that after many years not even a stain of melting snow has come thru, one can realize how well they are constructed and put together.

One house in particular has been used by me for over several years, part of that time as a playhouse for my little girl, but it became too small for her so I purchased a larger Hodgson House for her and turned the other one over for a tool house and there it will probably stay doing good service and no doubt outlast both the gardener and myself.

I have also used these houses at Golden's Bridge and I am now erecting them at Stone Hedge. I do not know just how they were developed but I will say that they are the nearest thing to perfection in their line, or the nearest thing to 100% plus, that I know of.

Very truly yours,

JOHN MCENTEE BOWMAN.

THE TWO EXTREMES

LABRADOR

INTERNATIONAL GRENFELL ASSOCIATION, INDIAN HARBOR, LABRADOR

"I am not in the habit of writing testimonials, but your cottage, which you sold me six years ago, has stood rather an exceptional test, I imagine, and it seems only fair to acknowledge it.

"It stands on a little rocky eminence about 120 feet above the harbor level. The site was chosen because of the superb view of the harbor and bay rather than for shelter, and a good deal of risk to the building was thereby involved.

"The strength and endurance of so light a building is really amazing. While we only reside in it some four months each year, as our winter headquarters are 140 miles up the bay, it has always been a real pleasure to come back to it and a certain amount of initial trepidation, when the full fury of a storm was felt, has given way to a confidence arising from the conviction that no harder test is possible than some of those experienced during the last six years."

(Dr.) H. L. PADDON.

FLORIDA

HURRICANE OF SEPTEMBER, 1926

"The Hodgson Cottage erected by you for me on Bradentown Beach, Gulf of Mexico, went through the terrible hurricane of September 17th and 18th without any damage of any kind. This is remarkable when I relate that cement brick business places on the beach were seriously damaged, the bricks or blocks being blown out of their places.

"The cottage was not only not damaged in the least, but nothing in it was hurt, and the clothing and beds and all furniture were entirely dry on the afternoon of the 18th, indicating that water had not leaked in.

"I know of no more severe test that a structure could be put to than this hurricane, the worst in the history of this State or perhaps of the South, and this cottage was entirely exposed without any wind breaks, or any other buildings near it to protect or shield it."
